

Data Sharing Statement

Smith MR, Hussain M, Saad F, et al. Darolutamide and Survival in Metastatic, Hormone-Sensitive Prostate Cancer. N Engl J Med. DOI: 10.1056/NEJMoa2119115.

Question	Authors' Response
Will the data collected for your study be made available to others?	Yes
Would you like to offer context for your decision?	—
Which data?	Other (eg, partial data sets) — please describe
Additional information about data	Dataset for primary analysis Anonymized patient-level clinical trial data, study-level clinical trial data, and protocols from clinical trials in patients for medicines and indications approved in the United States (US) and European Union (EU) as necessary for conducting legitimate research. This applies to data on new medicines and indications that have been approved by the EU and US regulatory agencies on or after January 01, 2014.
How or where can the data be obtained?	Interested researchers can use www.clinicalstudydatarequest.com to request access to anonymized patient-level data and supporting documents from clinical studies to conduct further research that can help advance medical science or improve patient care. Information on the Bayer criteria for listing studies and other relevant information is provided in the Study sponsors section of the portal.
When will data availability begin?	After product approval in Europe and the United States
When will data availability end?	—
Will any supporting documents be available?	—
Which supporting documents?	Other
Additional information about supporting documents	Annotated CRF, study protocol, study report, statistical analysis plan Additional information about supporting documents Anonymized patient-level clinical trial data, study-level clinical trial data, and protocols from clinical trials in patients for

	medicines and indications approved in the United States (US) and European Union (EU) as necessary for conducting legitimate research. This applies to data on new medicines and indications that have been approved by the EU and US regulatory agencies on or after January 01, 2014.
How or where can supporting documents be obtained?	Interested researchers can use www.clinicalstudydatarequest.com to request access to anonymized patient-level data and supporting documents from clinical studies to conduct further research that can help advance medical science or improve patient care. Information on the Bayer criteria for listing studies and other relevant information is provided in the Study sponsors section of the portal.
When will supporting documents availability begin?	After product approval in Europe and the United States
When will supporting documents availability end?	—
To whom will data be available?	Researchers whose proposed use of the data has been approved by an independent review panel.
For what type of analysis or purpose?	Anonymized patient-level data and supporting documents from clinical studies will be made available to researchers to conduct further research that can help advance medical science or improve patient care. Information on the Bayer criteria for listing studies and other relevant information is provided in the Study sponsors section of the portal.
By what mechanism?	Data access will be granted after approval by an independent scientific review panel. Bayer is not involved in the decisions made by the independent review panel. Bayer will take all necessary measures to ensure that patient privacy is safeguarded
Any other restrictions?	—
Additional information	—
